Naval Research Logistics Quarterly

Contents

Volume 31, 1984

Issue 1, March 1984

Mean Hazard Rate and Its Application to the Normal Approximation of the Weibull Distribution
Toji Makino 1

On a Rational Stopping Rule for Facilities Location Algorithms
Henrik Juel 9

Optimality Conditions for the Bilevel Programming Problem
Jonathan F. Bard 13

Product Moments of Order Statistics from the Doubly Truncated Exponential Distribution
N. Balakrishnan and P. C. Joshi 27

Periodic Inspection Policy with Preventive Maintenance
Toshio Nakagawa 33

A Primal Simplex Variant for the Maximum-Flow Problem
Fred Glover, Darwin Klingman, John Mote, and David Whitman 41

A Note on Specialized Versus Unspecialized Methods for Maximum-Flow Problems
Fred Glover, Darwin Klingman, Melissa Mead, and John Mote 63

Learning and Costs in Airframe Production: A Multiple-Output Production Function Approach
Thomas R. Gulledge, Jr., Norman K. Womer, and James R. Dorroh 67

A Note on the Constrained Shortest-Path Problem
Arun K. Pujari, Suneeta Agarwal, and V. P. Gulati 87

Inference on a Future Reliability Parameter with the Weibull Process Model
Grady Miller 91

Allocation Policies and Cost Approximations for Multilocation Inventory Systems
Awi Federgruen and Paul Zipkin 97

Coordinating Order Cycles under Joint Replenishments of Multi-Item Inventories
Vijay Aggarwal 131

A Load-Sharing Model: The Linear Breakdown Rule
Zvi Schechner 137

Some Branch-and-Bound Procedures for Fixed-Cost Transportation Problems
A. Victor Cabot and S. Selcuk Erenguc 145

A Characterization of the Wald Distribution
M. Ahsanullah and S. N. U. A. Kirmani 155

On Efficient Salvo Policies
Jerren Gould 159

An Efficient Heuristic for Large Set Covering Problems
Francis J. Vasko and George R. Wilson 163

Issue 2, June 1984

On the Optimal Policies of an Exponential Machine Repair Problem
Tapani Lehtonen 173

A Generalization of the Entropy Model for Brand Purchase Behavior
J. N. Kapur, C. R. Bector, and Uma Kumar 183

The Capital Supply Curve in Capacity Expansion Models: Some Economic and Algorithmic Aspects
S. Sen, S. K. Saraf, A. L. Soyster, and F. H. Murphy 199

Disaggregation in Economic Models
Charles Tiplitz 213

A Family of Games on $[1,\infty)^2$ with Payoff a Function of y/x
G. A. Heuer 229

Scheduling Stochastic Jobs on a Single Machine Subject to Breakdowns
K. D. Glazebrook 251

Continuous-Time Markov Decision Processes with Nonzero Terminal Reward
Kyung Y. Jo 265

Limit Laws in the Best of $2n - 1$ Bernoulli Trials
Richard A. Groeneveld and Barry C. Arnold 275

An Analysis of Constrained Robust Regression Estimators
Ronald G. Askin and Douglas C. Montgomery 283

A Model in Which Component Failure Rates Depend on the Working Set
Sheldon M. Ross 297

Reliability Interpretations of Some Concepts from Economics
Bengt Klefsjö 301

The Two-on-One Stochastic Duel
A. V. Gafarian and C. J. Ancker, Jr. 309

Minimizing the Sum of Absolute Lateness in Single-Machine and Multimachine Scheduling
P. S. Sundararaghavan and Mesbah U. Ahmed 325

A Note on the Model for Evasive Vehicle Movement Along a Fixed Path
Danny W. Turner and Paul T. Holmes 335

Issue 3, September 1984

Multiechelon Repairable-Item Provisioning in a Time-Varying Environment Using the Randomization Technique
Donald Gross and Douglas R. Miller 347

The Stochastic Duel with Time-Dependent Hit Probabilities
C. J. Ancker, Jr. 363

Distribution of Number of Point Targets Killed and Higher Moments of Coverage of Area Targets
Gerhard Schroeter 373

Evaluation of Costs of Ordering Policies in Large Machine Repair Problems
S. Christian Albright and A. Soni 387

Optimal Arrangement of Systems
Philip J. Boland and F. Proschan 399

Hu's Precedence Tree Scheduling Algorithm: A Simple Proof
James A. M. McHugh 409

A Simple Markov Model for the Analysis of Multiple Air Combat
P. D. Feigin, O. Pinkas, and J. Shinar 413

Scheduling Spares with Exponential Lifetimes in a Two-Component Parallel System
Gideon Weiss 431

Quadratic Forms in Spherical Random Variables: Generalized Noncentral χ^2 Distribution
T. Cacoullos and M. Koutras 447

An Efficient Heuristic for the Multi-Item Newsboy Problem with a Single Constraint
Steven Nahmias and Charles P. Schmidt 463

Estimating the Common Location Parameter of Exponential Distributions with Censored Samples
Wen-Jau Chiou and Arthur Cohen 475

An Acceptance Life Test for High-Reliability Products
John E. Angus, Ray E. Schafer, and Herbert C. Rutemiller 483

A Method for Estimating the Parameters of Reliability Models
D. N. Naik 493

Issue 4, December 1984

Approximations for Departure Processes and Queues in Series
Ward Whitt 499

Cost Analysis of Warranty Policies
D. G. Nguyen and D. N. P. Murthy 525

Optimal Policy of Continuous and Discrete Replacement with Minimal Repair at Failure
Toshio Nakagawa 543

Stochastically Minimizing the Makespan in Flow Shops
R. D. Foley and S. Suresh 551

Estimation for a Weibull Accelerated Life Testing Model
Ronald E. Glaser 559

Finite Markov Chain Models Skip-Free in One Direction
G. Latouche, P. A. Jacobs, and D. P. Gaver 571

Application of Disjunctive Programming to the Linear Complementarity Problem
B. Ramarao and C. M. Shetty 589

Sample Sizes for β-Expectation Tolerance Limits Which Control Both Tails of the Normal Distribution
Youn-Min Chou 601

An Inventory Model with Finite-Range Stochastic Lead Times
Georghios P. Sphicas and Farrokh Nasri 609

Testing Goodness of Fit to the Increasing Failure Rate Family
Robert Tenga and Thomas J. Santner 617

Testing Goodness of Fit to the Increasing Failure Rate Family with Censored Data
Thomas Santner and Robert Tenga 631

Inequalities Involving the Lifetime of Series and Parallel Systems
William E. Stein, Ronald Dattero, and Roger C. Pfaffenberger 647

Layered Defense of Deceptively Based ICBMs
Jerome Bracken 653

Multistate Reliability Models
Nader Ebrahimi 671
